Hello Teachers,

Thank you for downloading this handout. After decades of teaching, now I'm sharing activities I designed for my classes and some new ones as well.

Please visit UnCommon-Core.com. While you are there, sign up for your free copy of **Colorful Collections: A Mindful Exploration of Proper Fractions**.

In addition to **Colorful Collections**, you will receive a Wednesday morning email with teacher tips, educational ideas, or a free version of whatever I'm working on at the moment. You get to use it for free, and I benefit from your questions and comments.

Also, visit my Teachers Pay Teachers store Uncommon-Core dot com.

Thank you again. All the best,

Isabelle

Spiral 100 Charts

Just like hanging a map upside down, using a spiral 100 chart will get your students thinking. They will be able to look at familiar information in a new way; from a new point of view.

Invite your students to 'play' with the spiral 100 chart.

They could highlight:

- Multiples of various numbers,
- Square numbers,
- Numbers with a specified digit sum,
- Even numbers,
- Odd numbers,
- Compare with a square 100 chart,
- Or . . . ?

This PDF is a free sample. I want to share the idea with you so you can try it out and let me know what you and your students value about the experience. Thank you, Isabelle
